<b>Course</b>	UNIK4710, UNIK9710
<b>Title</b>	Basics of Semantics
<b>Lecture date</b>	2012/01/27
<b>Lecturer(s), (users)</b>	Josef.Noll
<b>Objective</b>	The objective of this lecture is to explain the principles of Semantic Technologies, including* the elements of semantics* the differences between .rdf, .owl* clarification on expectations towards semantics
<b>Learning outcomes</b>	<p>Having joined this lecture, you</p> <ul style="list-style-type: none"> <li>Understand the need for semantics</li> <li>can list the basic elements of semantic technologies</li> <li>understand the differences between semantic web and semantic web services</li> <li>Next: Identify semantic technologies for description of the user and his context</li> <li>Next: Describe the difference between ontologies and rules</li> </ul> <p><i>Handwritten notes:</i> data "overflow", human interaction, computer work, rdf, owl, tripple, rdfs, reasoner, rules, SWRL, SPARQL</p>
<b>Pensum (read before)</b>	<p>To do:</p> <ul style="list-style-type: none"> <li>create a short overview over the topic you would like to work with. The topic should be explained in terms of a "scenario"</li> <li>watch the YouTube videos and prepare a list of questions</li> </ul> <p><i>Handwritten note:</i> *3</p>
<b>References (further info)</b>	<p>References:</p> <ul style="list-style-type: none"> <li>Trends in the future: <a href="http://www.slideshare.net/matthewbuckland/future-web-trends">http://www.slideshare.net/matthewbuckland/future-web-trends</a></li> <li>An introduction to the semantic Web: <a href="http://www.youtube.com/watch?v=OGg8A2zfWKg">http://www.youtube.com/watch?v=OGg8A2zfWKg</a></li> <li>And some more fun - Ordering of a Pizza in the future: <a href="http://www.youtube.com/watch?v=RNJI9EEcsoE&amp;feature=related">http://www.youtube.com/watch?v=RNJI9EEcsoE&amp;feature=related</a></li> </ul> <p>Discussions</p> <ul style="list-style-type: none"> <li>Tagging versus semantics: <a href="http://www.youtube.com/watch?v=olDpQwR8Fhk">http://www.youtube.com/watch?v=olDpQwR8Fhk</a></li> </ul> <p>Video</p> <ul style="list-style-type: none"> <li>Video for the second lesson: <a href="mms://lux.no/unik4710-JN/UNIK-20120127.wmv">mms://lux.no/unik4710-JN/UNIK-20120127.wmv</a></li> </ul>
<b>Keywords</b>	Semantic Technologies, Tripple Store, RDF, OData, Tags

<b>Title</b>	<b>Mobile Service Delivery</b>	<b>UNIK4710</b>
	<p>The course links the mobile and Internet service world together with user preferences and context information (e.g. location, people, activity). The following two examples explain situations where Mobile Semantic Service Delivery is required.</p> <p><i>Example 1: The way mobile advertisements are being received by you depend very much on your situation and your interest. - If you are running to the train to catch it, you don't want to be disturbed by anything else than the message that the train is delayed</i></p> <p><i>Example 2: Building communities in mind is independent of physical locations. - It's more fun to watch TV together. Let's enable chat and talk with all my friends watching the same TV channel as me.</i></p> <p>During the course we will develop some examples of personalised and context-aware services. Feel free to think about an example which fits for you.</p>	<p>First Lecture on 20. January 2012, 0900-1200 h.</p> <p>The course is given at UNIK, with video communication to Room Scheme@lfi.UiO.no (1251)</p> <p><b>Organisation</b> UNIK</p> <p><b>Lecturer(s), (users)</b> Josef.Noll</p>
