# WebProtégé

**WebProtégé is a free, open source collaborative ontology development environment for the Web.**

We encourage end users to use our hosted solution at: <http://webprotege.stanford.edu>. Alternatively, WebProtege can be [downloaded and installed](#) on your own server.

**WebProtege provides the following features:**

- Support for editing OWL 2 ontologies
- A default simple editing interface, which provides access to commonly used OWL constructs
- Full change tracking and revision history
- Collaboration tools such as, sharing and permissions, threaded notes and discussions, watches and email notifications
- Customizable user interface
- Customizable Web forms for application/domain specific editing
- Support for editing OBO ontologies
- Multiple formats for upload and download of ontologies (supported formats: RDF/XML, Turtle, OWL/XML, OBO, and others)

**navigation**

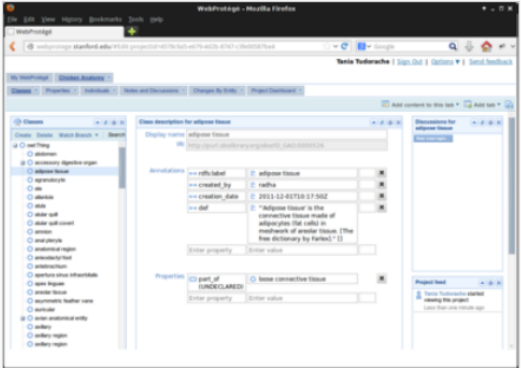

- Main Page
- All Categories
- All Properties
- All Templates

## Documentation

### User's Guide

A short [user guide](#) with screencasts and screenshots describing the main user interface elements in WebProtégé.

### Download and Install - Administrator's Guide

A [step-by-step guide](#) for site administrators who want to download and install WebProtégé.

Profile

goal-driven approach.

time aspect

history / long-term

seasonal / short

climate / sun / rainy

What help do I want to give a user?

60% brain  $\hat{=}$  last 3 hours

# Smart Home

Goal driven:

energy

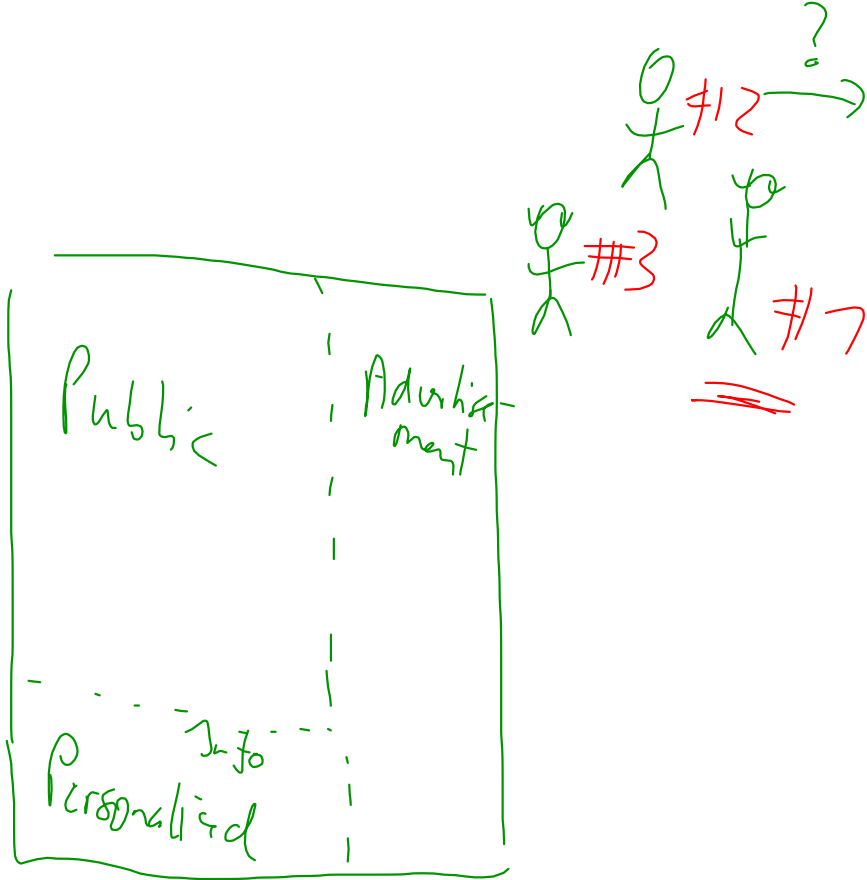

convenience

"warm when arrive"

Security

health

# Local Presence

Goal: ~~Person~~ <sup>Company</sup>  
food air carrier  
1) personalised advise  
on travel "guidance"

2) finding a shop/restaurant of interest

Local Presence = "walking on the street"

Goal:

- tourist

- "saturday night"  
have fun

- shopping center

fast | new inspiration

find | shop - 5 things  
"fastest way"

# Air Quality Index ?

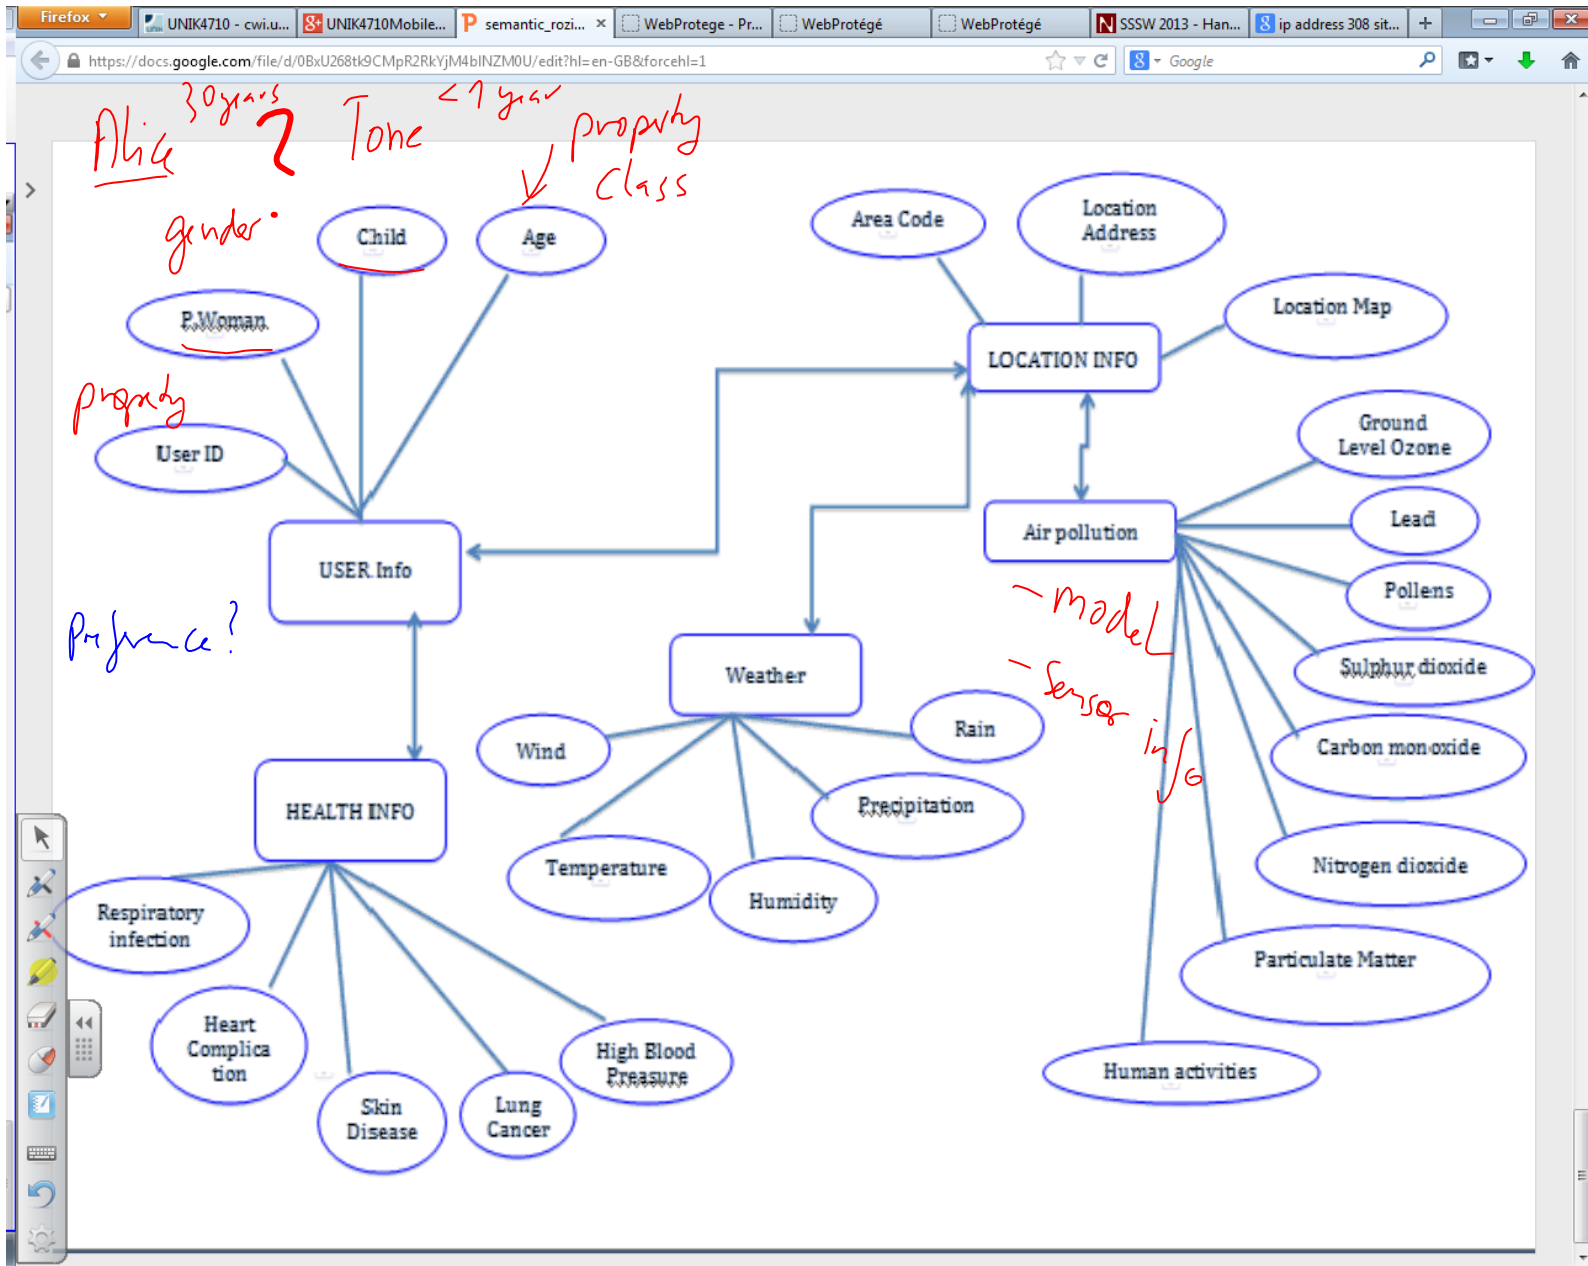

*how to compile?* → Semantic

Air Quality Index Levels of Health Concern	Numerical Value	Meaning
Good	0-50	Air quality is considered satisfactory, and air pollution poses little or no risk.
Moderate	51-100	Air quality is acceptable; however, for some pollutants there may be a moderate health concern for a very small number of people who are unusually sensitive to air pollution.
Unhealthy for Sensitive Groups	101-150	Members of sensitive groups may experience health effects. The general public is not likely to be affected.
Unhealthy	151-200	Everyone may begin to experience health effects; members of sensitive groups may experience more serious health effects.
Very Unhealthy	201-300	Health alert: everyone may experience more serious health effects.
Hazardous	> 300	Health warnings of emergency conditions. The entire population is more likely to be affected.
