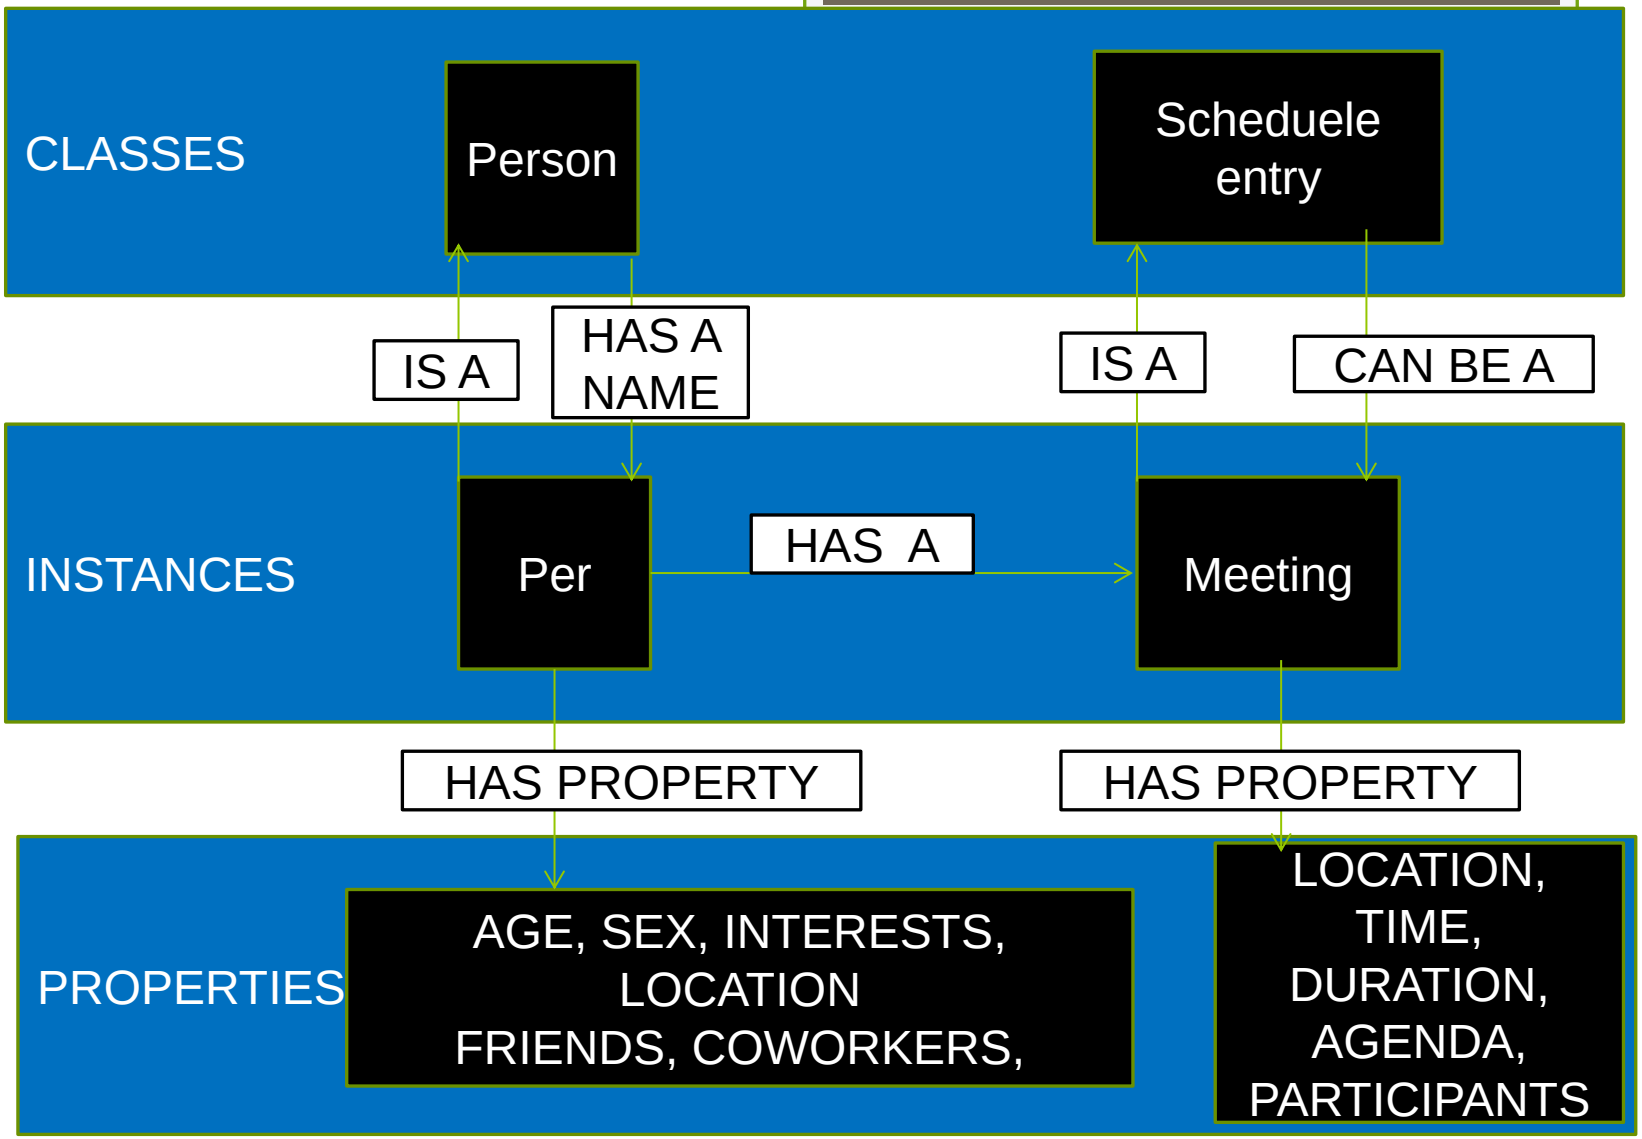
->Context Based Calendar

- Same idea, narrower focus.
- Link all of your calendar events to your contacts.
- Invite them to your events.

How does it work?

- Calendar entry for 0900.
- 0845: GPS locator, are you there yet?
- Where are you?
- ETA?
- Means of transport?
- Speed?
- Traffic conditions?



CLASSES

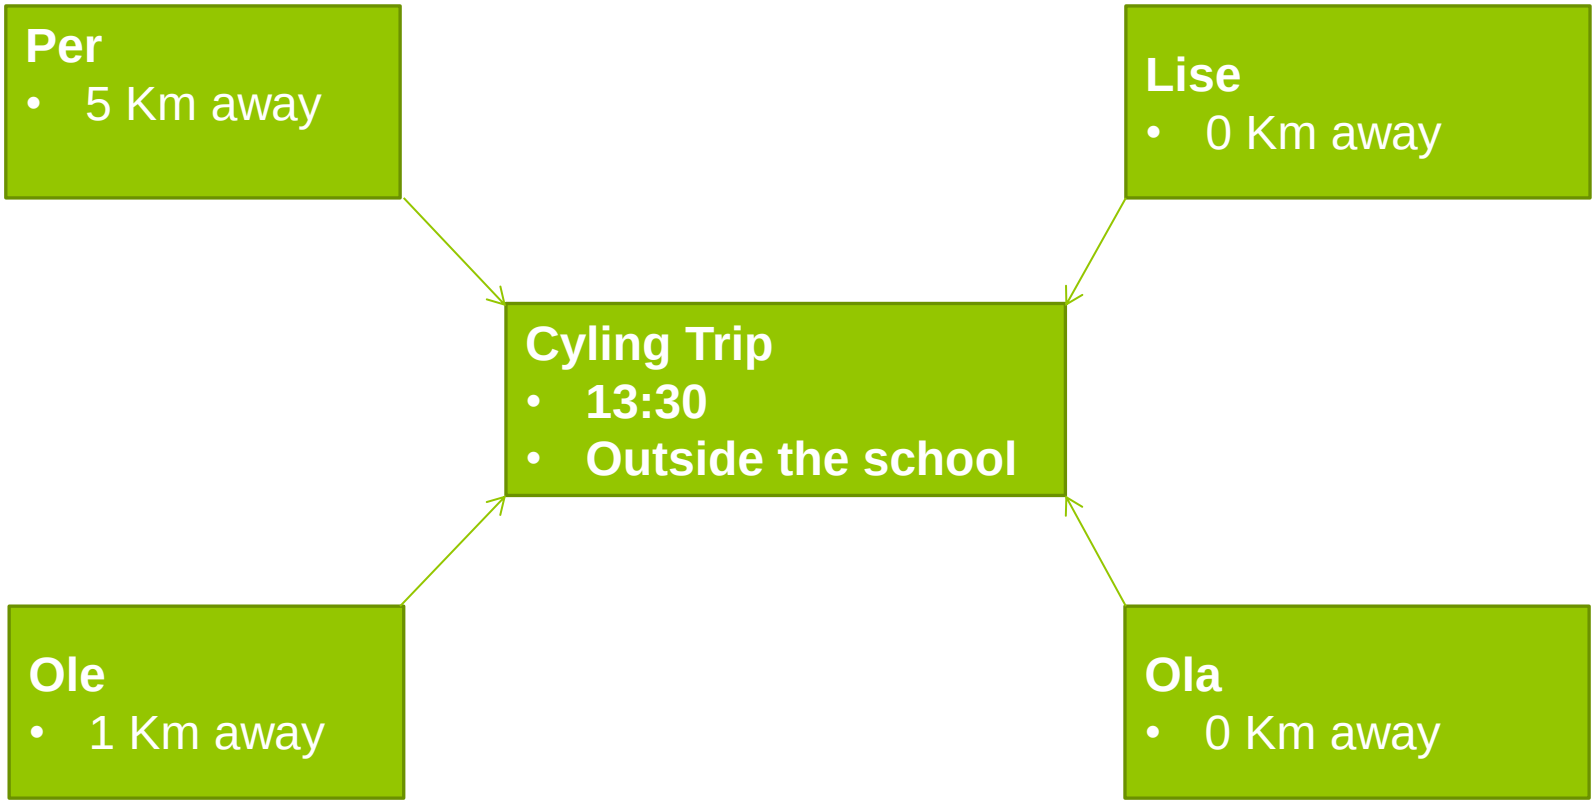
LOCATION, TIME, DURATION, AGENDA, PARTICIPANTS



- Per is late
- Notify the others
- Suggest they meet him?

The technical solution/rules

- Simple APP
- GPS
- Calendar
- Contacts
- If(CurLocation != MeetingLocation){
  calculateETA(speed, distance);
  new sms(AllMeetingParticipants, ETA);
  }
- Endless posibilities.
