- Smart Networks - for whom?
  - Industry (secured wireless, Industry 4.0)
  - Consumer (IoT, Entertainment)
  - Individuals and Societies (...)
- Addressing the Grand Challenges
  - Climate
  - Resources
  - Societal Gap
- Freemium Network Access “Internet lite for all”
  - Application specific routing
  - Digital Empowerment

# Smart Networks for Industry

- Core demand
- Edge intelligence
  - ➔ Edge/fog computing
- End-to-end QoS and isolation
  - ➔ network slicing
  - ➔ heterogeneity(?)

- 1 5G may be disruptive for the manufacturing industry
- 2 Edge computing for shifting intelligence to the network
- 3 Network slicing for providing end-to-end QoS & isolation
- 4 Many industrial requirements not fully addressed yet
- 5 Close interaction of the whole ecosystem needed
- 6 Industry 4.0 may become THE killer application for 5G 😊

largest security project in EU

58 partners from 12 countries

80 M€ budget  
35 M€ EU & national

# Secured Connected Trustable Things (SCOTT)

SECURITY

PRIVACY

TRUSTABILITY

USABILITY

SAFETY

Automotive

Home

Rail

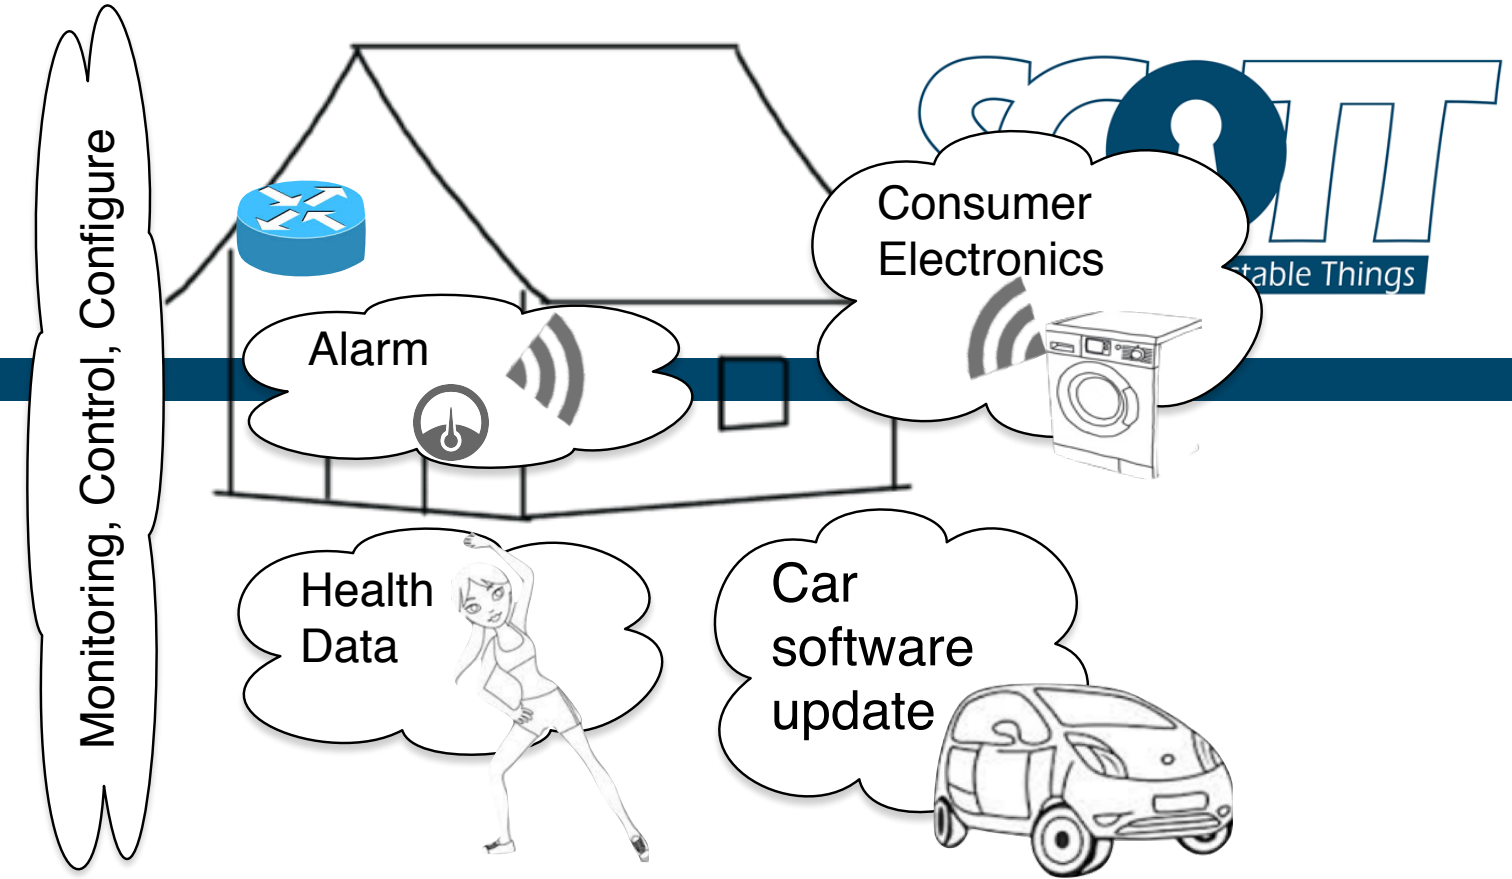

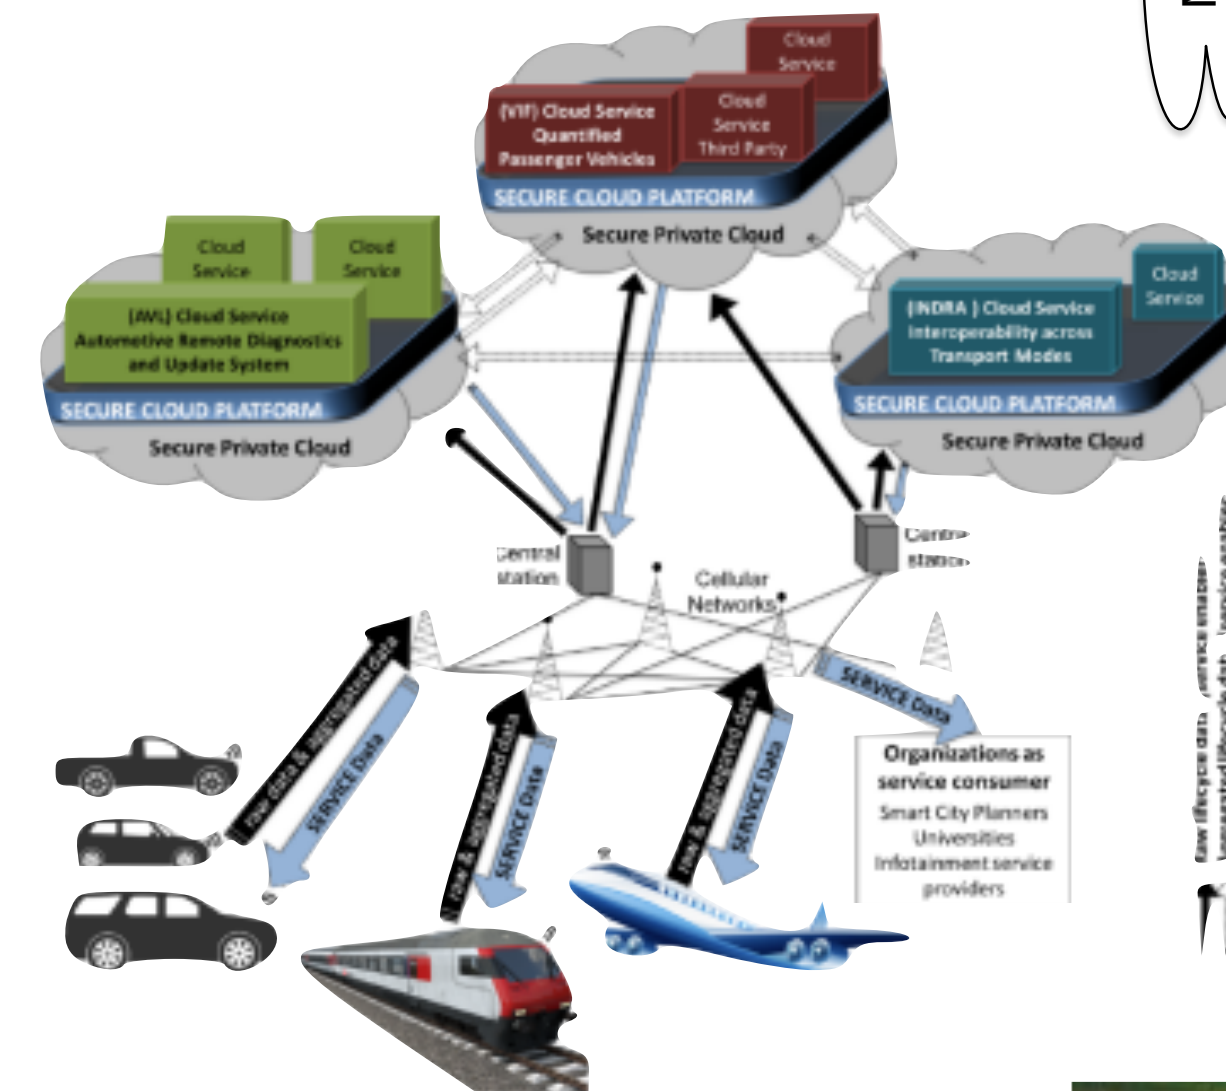

5G

Avionics

- 15 industry-driven Use Cases (TRL 6-7)
- 40 Technology Building Blocks
- 25 Demonstrators
- 5 Domains: Automotive, Aeronautics, Home/Building, Rail, Healthcare, - truly "cross-disciplinary"
- 2017 – 2020 (started in May 2017)

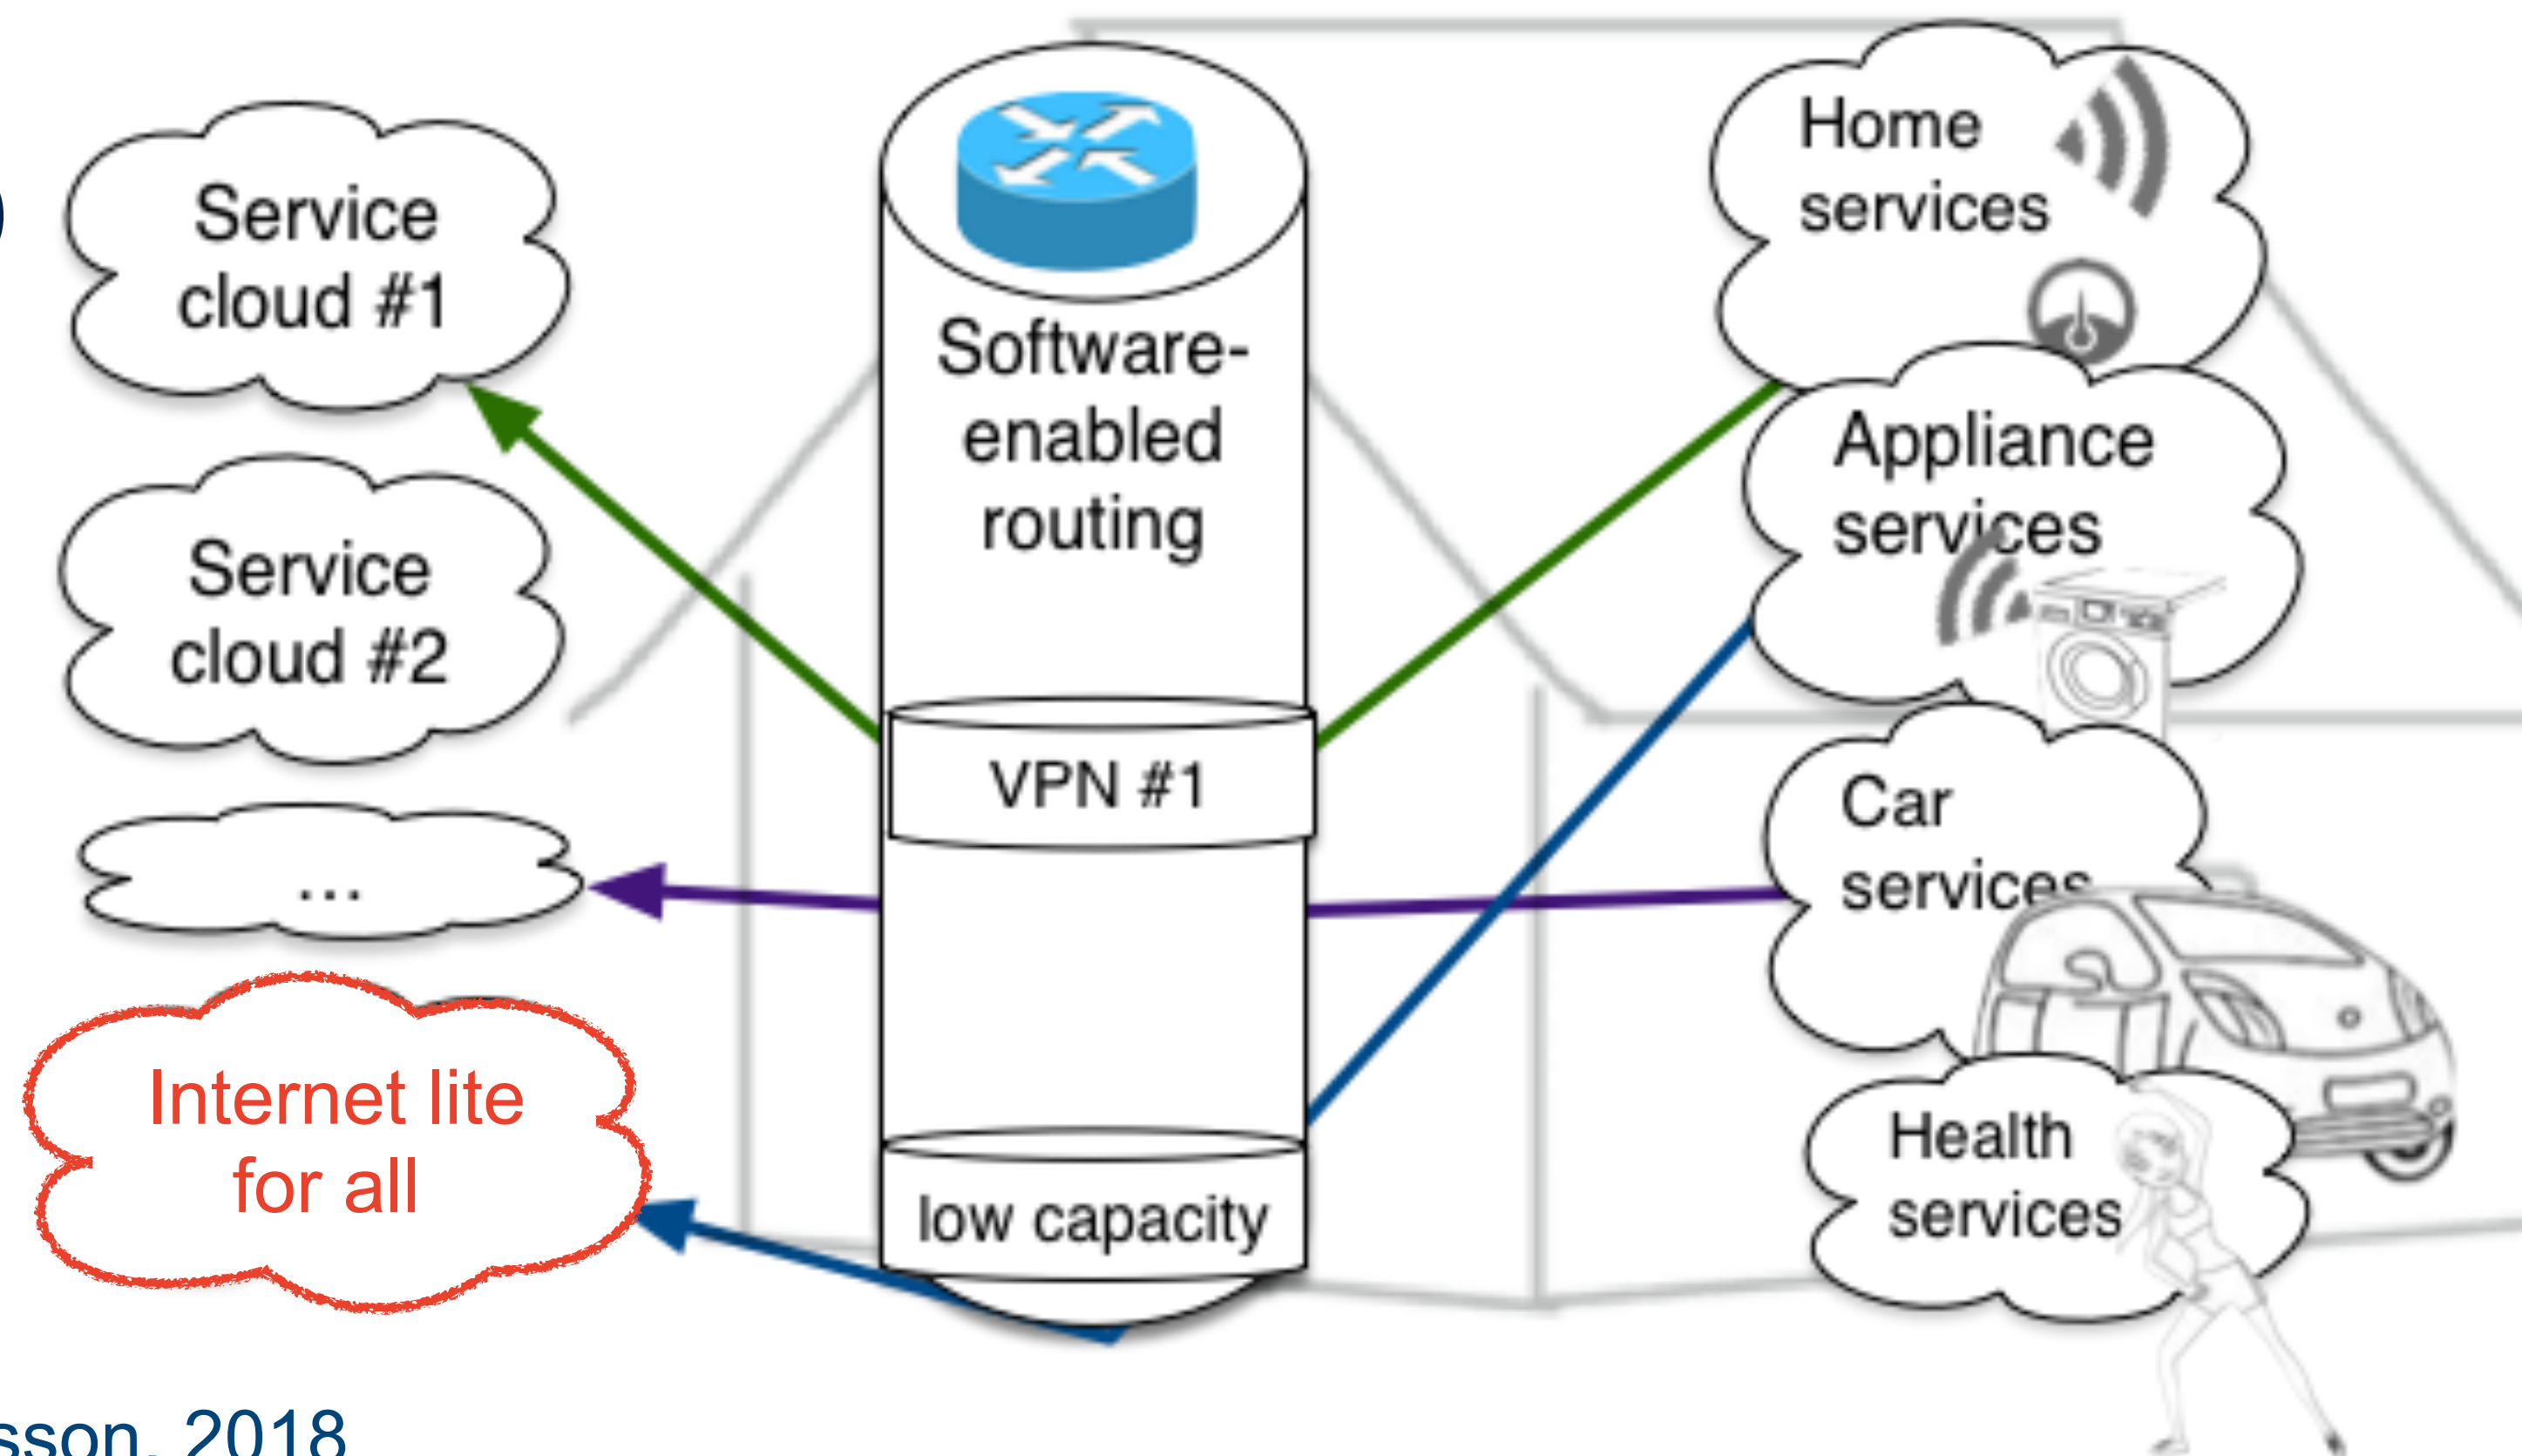

# High-level vision for each domain

- Home/Infrastructures: **Cost-efficient monitoring** and **management** for trusted services
- Mobile: **Configurable** networks providing **reliable** services
- Automotive: Security architecture for **accident-free** transport
- Rail: Highly flexible train **composition**
- Aeronautics: **Security-Safety**

# Smart Networks - the home domain

- **Cost-efficient monitoring and management** for trusted services
  - Wireless **management**
  - **Security** monitoring
  - Service harmonisation (**5G@home**)
  
- The digital Divide
  - **10x increase** in Mobile Broadband (2013-2019) [1]
  - Netflix, YouTube, Hulu
  - **26%** of NO-subscribers **don't have** [2]
  - 8% (400.000) NO not connected to the Internet [3]

# Smart Networks in a changing world

- Smart networks
  - End-to-end service quality
  - Security and Privacy
  - Application specific routing
  - Service differentiation
  - 5G@Home

- Will enhance
  - the **digital divide**

- **Grand Challenges**
  - Climate
  - Resources (radio, minerals)
    - ▶ Kobald (East - DR Congo)
  - Divide
- How are **we** going to **address the challenges?**
  - Smart Networks for border control  
- or -
  - Digital Inclusion through **Freemium** Model for **Access #5GforAll**

## The challenge of area coverage

- Land area Norway, 385.178 km<sup>2</sup>  
7500 basestasjons
- <http://www.mynewsdesk.com/no/telenor/pressreleases/sjekk-naar-du-faar-4g-der-du-bor-1399662>
- Tanzania 947.303 km<sup>2</sup> = **3 x** Norway,
- Mali 1.240.000 km<sup>2</sup> = **4 x** Norway
- DR Congo 2.345.000 km<sup>2</sup> = **8 x** Norway
- Economy in building Wireless Broadband

**#5GforAll**

“Internet had the ability to dismantle the divide. Internet failed miserably, the divide is bigger than ever.”  
Kate Gilmore, Human Rights, UNO

~50% 2G in 2020

# Google translate Partnership for Digital Africa

<http://www.aftenposten.no/meninger/debatt/Kronikk-Som-gjesteland-pa-G20-toppmotet-ma-wi-bidra-til-a-endre-verden--Erna-Solberg-614076b.html>

**Comment: As a guest country at the G20 summit, we must help to change the world | Erna Solberg**

ERNA SOLBERG (H), PRIME MINISTER

UPDATED: 30.JAN.2017 9:39 P.M. | PUBLISHED: 30.JAN.2017 7:58 P.M.

In July last year was Erna Solberg invited by Angela Merkel for this year's G20 meeting. Here from a meeting between the German Chancellor and the Norwegian Prime Minister in Berlin in November, where Norway's participation as guest country at the economic summit were among issues discussed.

## 1. UN sustainability goals and Agenda 2030:

Germany has chosen this agenda as a backdrop for their entire program for the presidency, and I lead a group at the United Nations that will drive towards implementation.

We will work to ensure that the G20 goes ahead with its own specific commitments to help achieve sustainability goals.

## 2. Migration and partnership with Africa:

The world is experiencing the greatest influx of refugees since World War II. Europe, and especially Germany, have seen the consequences of that.

**It is necessary to improve the situation where people break up close.** Germany will use its chairmanship to do something about the problems which people belong. There is no minimum job creation and private investment. There are agreements with African countries wishing to achieve it.

G20 can therefore help the countries and international organizations use their resources more on measures which create growth and job creation.

## 3. Health and education.

Norway has long had a heavy international involvement. Education and health are associated with economic growth.

# Internet lite for All - the “walk on the Internet”

## Road Infrastructure

- Basic infrastructure

- free usage for pedestrians & cyclists
- authentication for cars
- Pay for use model when a license plate is required

- Highways & toll roads

- speed & comfort
- often privately managed

## Freemium Model “Internet Lite for All”

- Free Access

- free access of information
- text, pictures and local video

- Premium Access

- Broadband, speed & comfort
- Voice, video & games
- privately managed

# Internet lite for all

*the catalyst for the goals*

- *“Non discriminating access” project*
  - funded by RCN and Mfa/Norad (14.9 MNOK for 2017-2020)
  - Tanzania: digital health

# contribute to Migration and Partnership with Africa

- Example: Digital Tanzania

- ➔ Unconnected: 13 Million people in 4.000 villages
- ➔ Combined effort

GSM + Wifi  
➔ 200W  
➔ MicroBTS

Cost: 70 kUS\$/village

## 2. Migration and partnership with Africa:

The world is experiencing the greatest influx of refugees since World War II. Europe, and especially Germany, have seen the consequences of that.

**It is necessary to improve the situation where people break up close.** Germany will use its chairmanship to do something about the problems which people belong. There is no minimum job creation and private investment. There are agreements with African countries wishing to achieve it.

G20 can therefore help the countries and international organizations use their resources more on measures which create growth and job creation.

- Funding requirements

- ➔ 0.25 B€ for Digital Tanzania
- ➔ 4.5 B€, DE for hosting refugees (2017)
- ➔ 89 B€ 2016-budget for EU Frontex border control

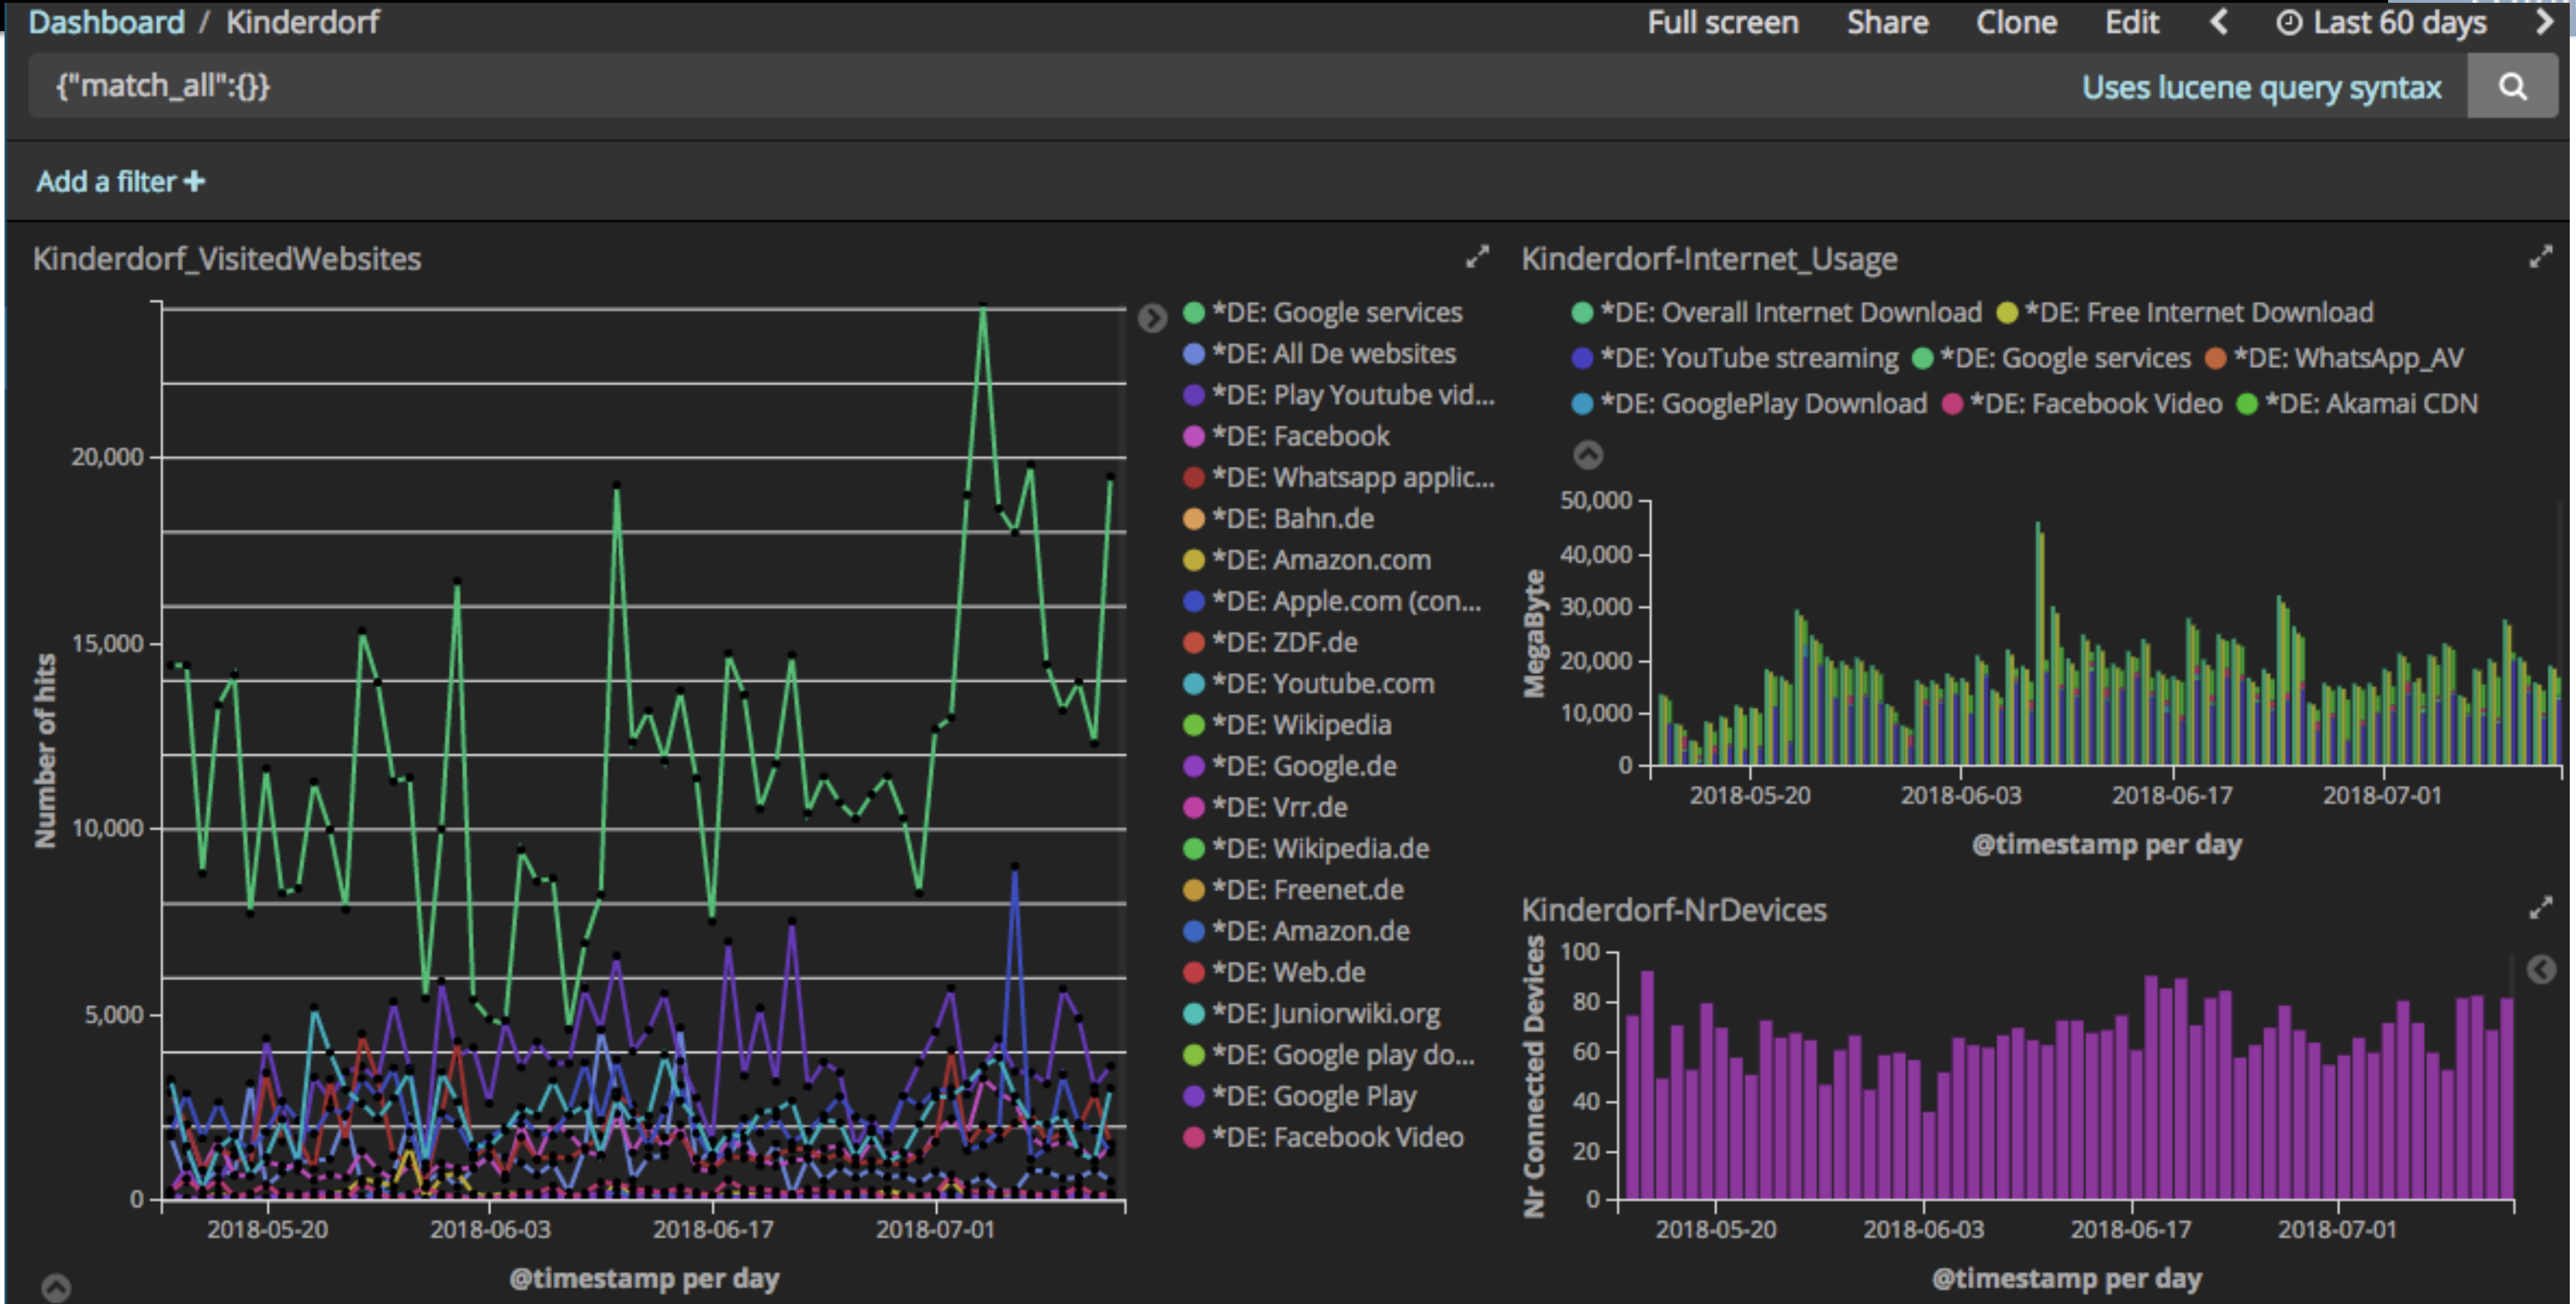

# Collaboration: Caritas - Basic Internet Foundation

- Internet lite in the Caritas Kinderdorf (Bottrop, DE)
  - ➔ Free information access for 60 children/youngsters
  - ➔ Pedagogical concepts including the children

- Partnership with Caritas (Diozöse Essen)
  - ➔ Digital Participation for all
  - ➔ Social Innovation “Social Digital Hubs”
  - ➔ Free Information access “Internet lite for all”

# Overview service offers & Network Management

# Smart Network contribution for digital inclusion

- Traffic categorization
  - text, pictures & local video
  - broadband services
- Service-aware charging & control
  - **Freemium** model for access
  - free information
  - premium broadband
  - 1 premium pays for 300 free

[Source: Service Innovation through Smart Networks, Ericsson, 2018]

# Conclusions: Using Smart Networks to reach the society

- **Internet lite** for **all**
  - ➔ “Nobody should be left out from the Digital Society”
  - ➔ Give everyone **access to digital information**
- **Traditional business** models are too slow
  - ➔ Mobile broadband roll-out dominated by return on investment
  - ➔ Premier league, Bollywood **outranges non-profit content**
- Address the Digital Divide through Smart Networks
  - ➔ Provide at least **one Information Spot** in each village
  - ➔ **Internet lite for all** - the freemium model for access
  - ➔ **Premium** access to profitable content - **sustainable** solution
