GLOBVAC 2021, 20-21Apr2021

Digital Health Promotion in the Global South as part of Digital Public Goods

Josef Noll

University of Oslo (UiO)
Basic Internet Foundation

m: +47 9083 8066, josef@basicinternet.org

Wouldn't it be wonderful?

- ➔ “Free access to health information on the Internet is a human right”
- ➔ Reality
 - Smartphone costs
 - “Boys have the toys” (33% boys, 16% girls - BD)
 - Smartphone costs >25% of av. monthly income (2.5 billion people)
 - Costs of bandwidth
 - 1 GB costs 5% of av. monthly income
 - \$ 428 billion is needed for high-quality bandwidth
 - Digital Skills

Suggestion by Norway for Digital Transformation

- ➔ White Paper to the Parliament
Meld. St. 11 (2019-2020)
 - **Priorities:** Access, skills, regulations, inclusion
- ➔ **Integrated model** for digital inclusion
 - School connectivity (SDG indicator 4.A.1)
 - ▶ Digital Health Promotion at Schools
 - Knowledge Portal as facilitator
 - ▶ **Trusted** (health) information
 - ▶ Knowledge transfer & **collaboration**
 - ▶ **Free Access** to Knowledge
 - **Community** involvement

Norwegian Ministry
of Foreign Affairs

Summary

Meld. St. 11 (2019–2020) Report to the Storting (white paper)

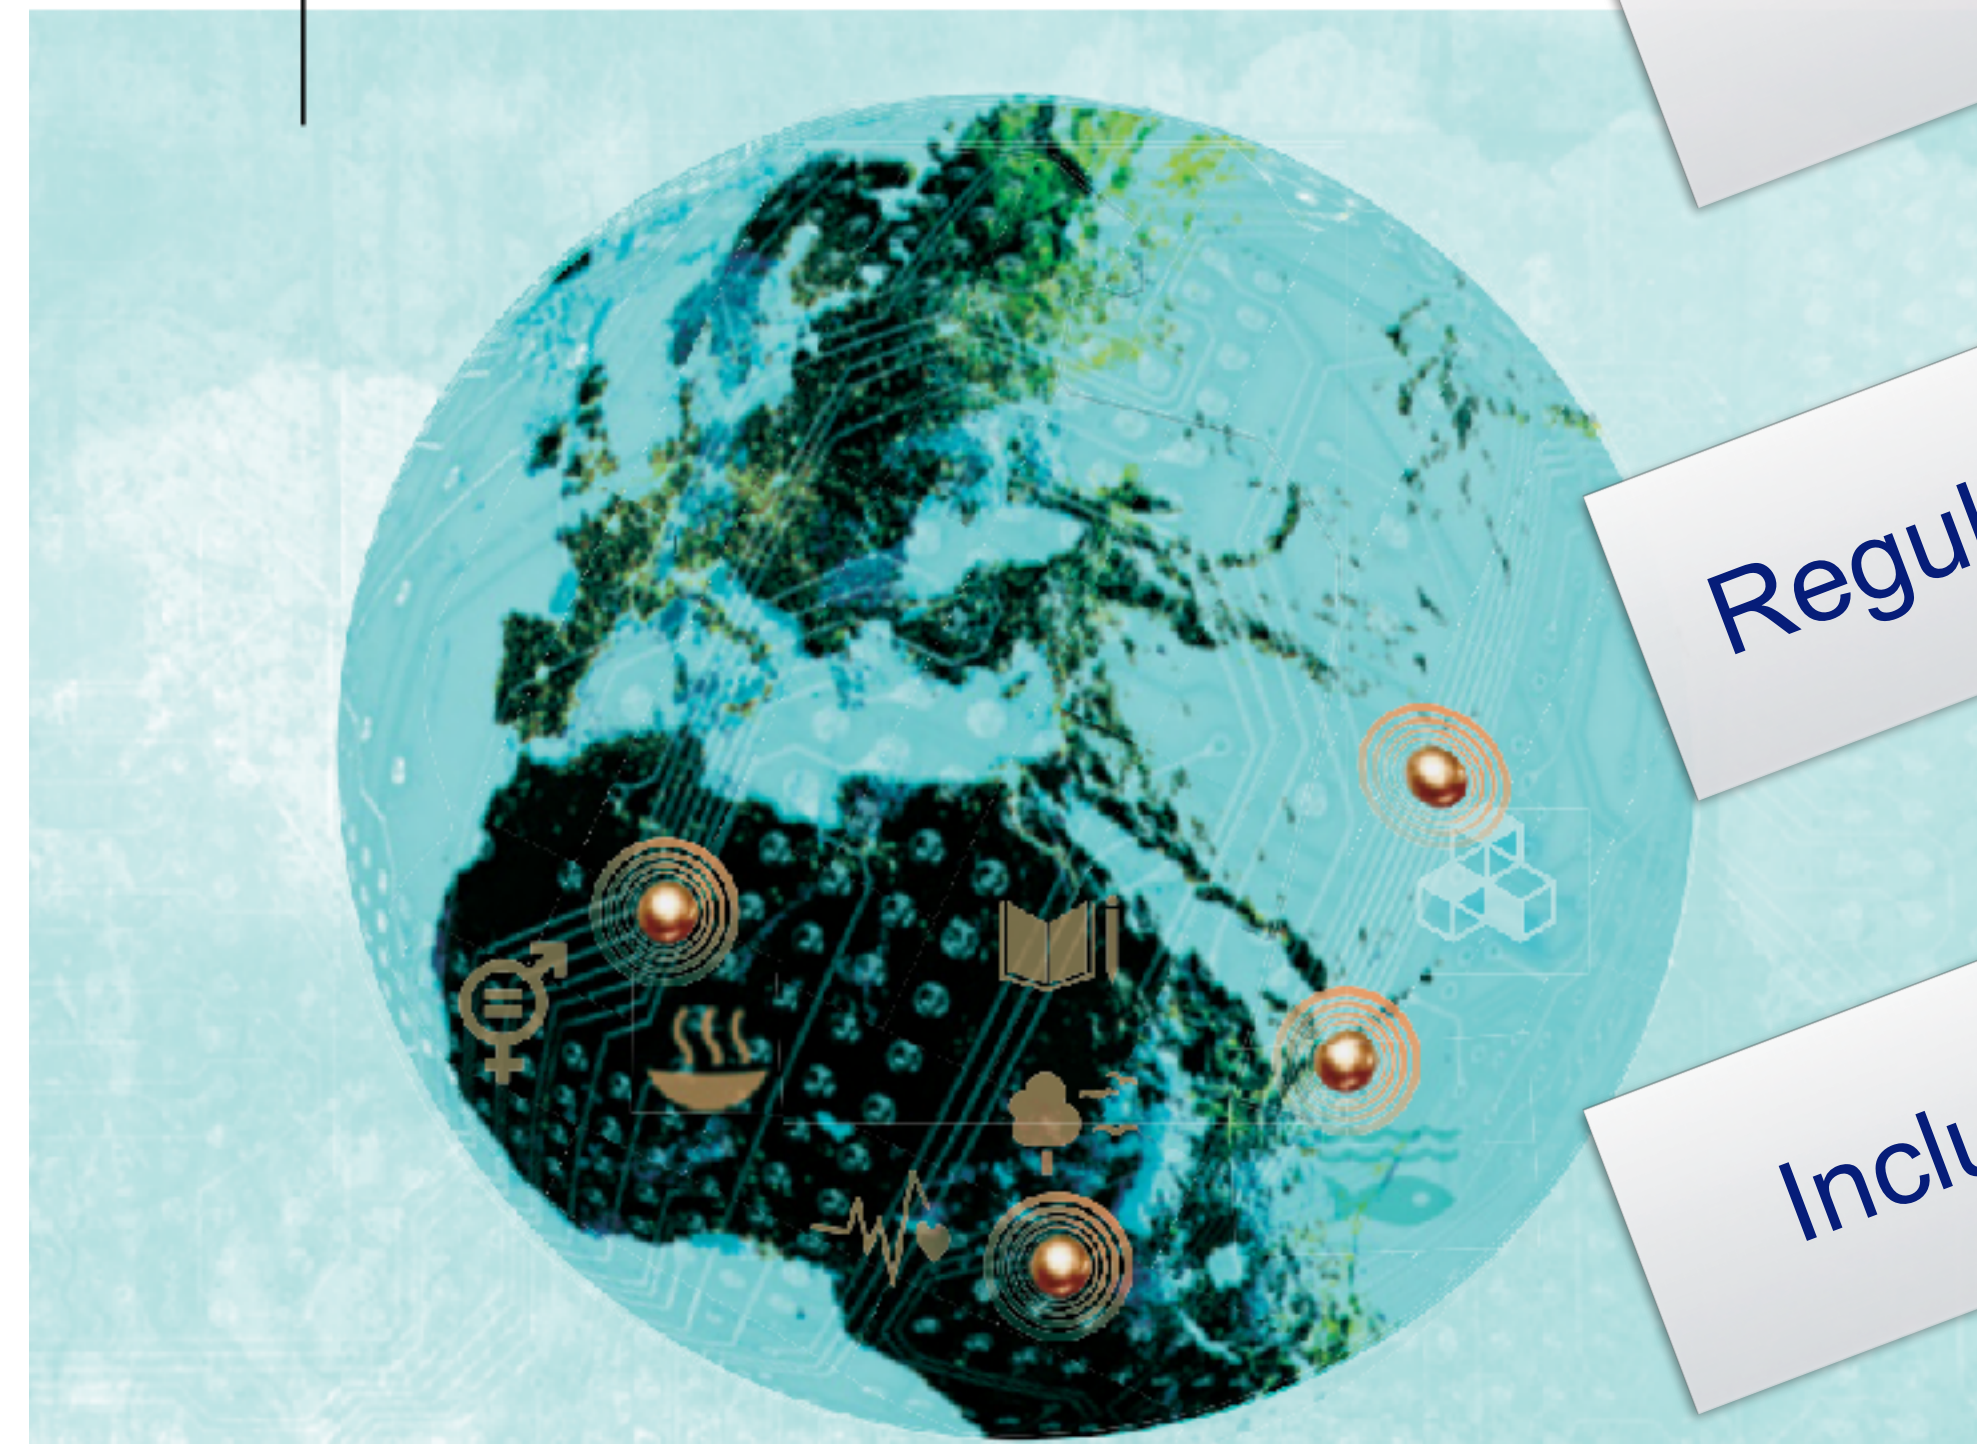

Digital transformation and development policy

Access

Skills

Regulations

Inclusion

Local presence - Village Platform

<http://Yeboo.com>

The website will contain locally stored information on

- Health
- Entrepreneurship
- Education
- Agriculture
- Financial inclusion (e.g. via Women Community Centers)

Exemplary: Digital Health Information

Digital inclusion is a key for health, education and meaningful work. Connecting developing economies with free access to information through the alliance of IT, Telecom, Academia, and public sector partners will create the partnership for achieving the Sustainability Development Goals (SDG 2030).

Beware of Coronavirus is created with support from RELIGHT. The Story of Tapeworms, The Story of HIV, The Story of Tuberculosis and The Story of Anthrax are created with support from The Digi Project.

Health Videos in English

Beware of Coronavirus

The Story of Tapeworms

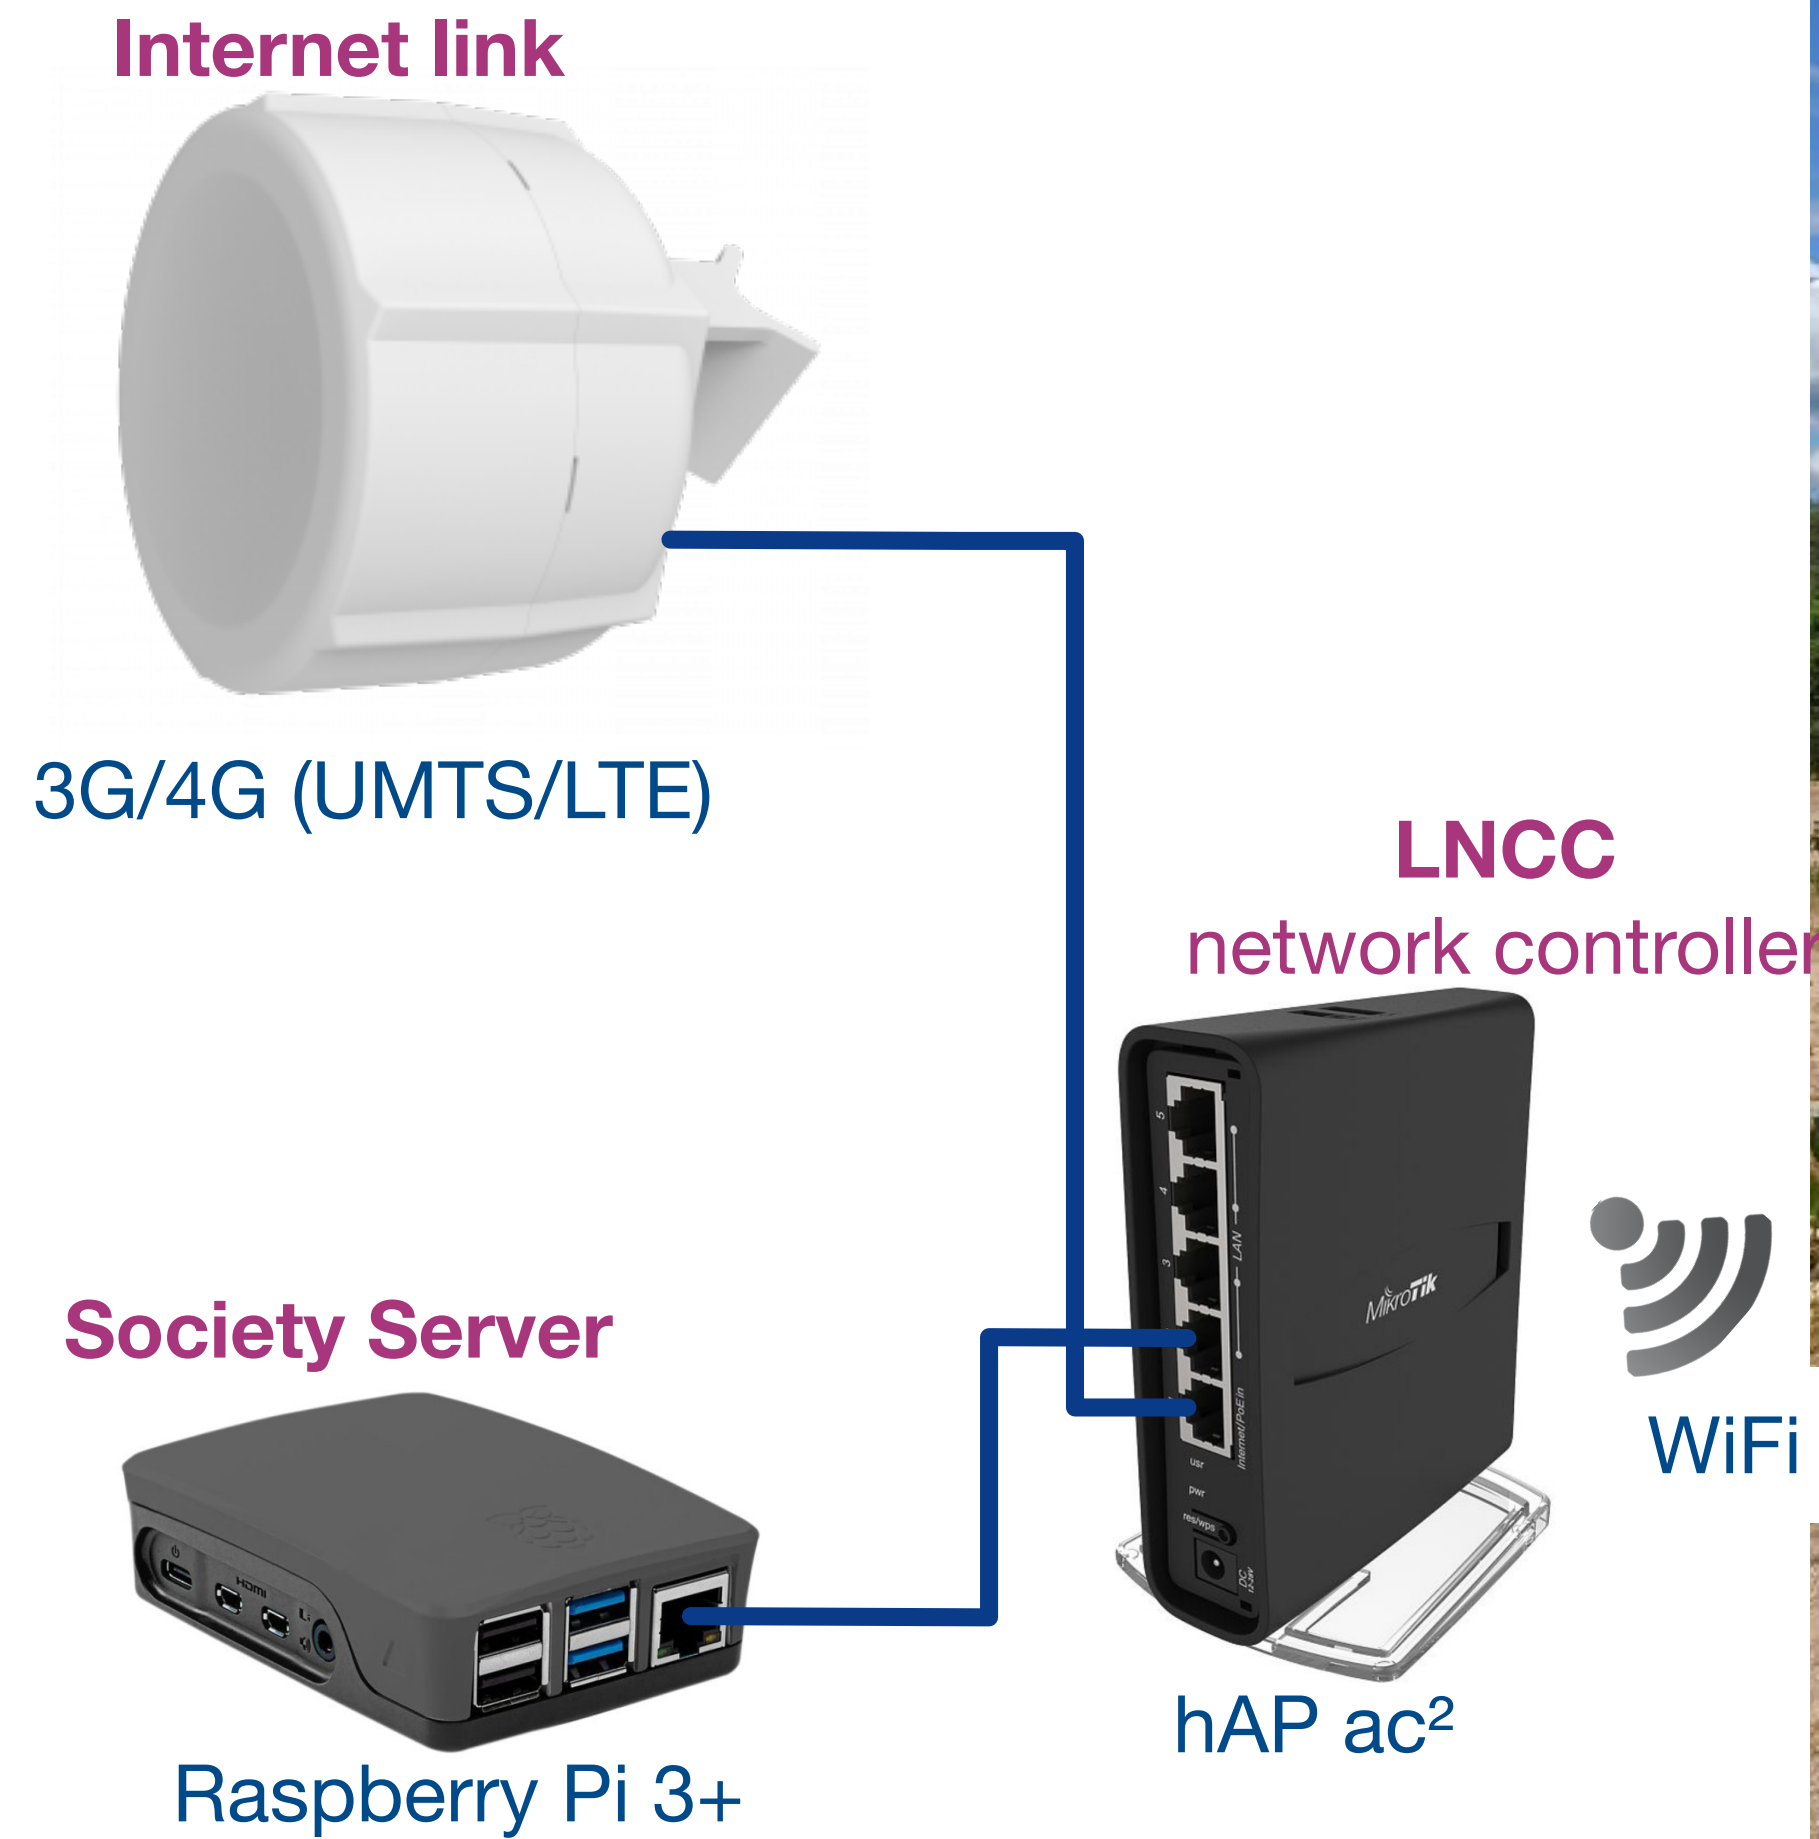

Success story: Digital Health Promotion

[http://
DigitalGlobalHealth.no](http://DigitalGlobalHealth.no)

Results in TZ: **Knowledge increase**
Cysticercosis (TSCT) 60%
Tuberculosis 30%
HIV/AIDS 13%

Connecting the Unconnected “WiFi Information spot”

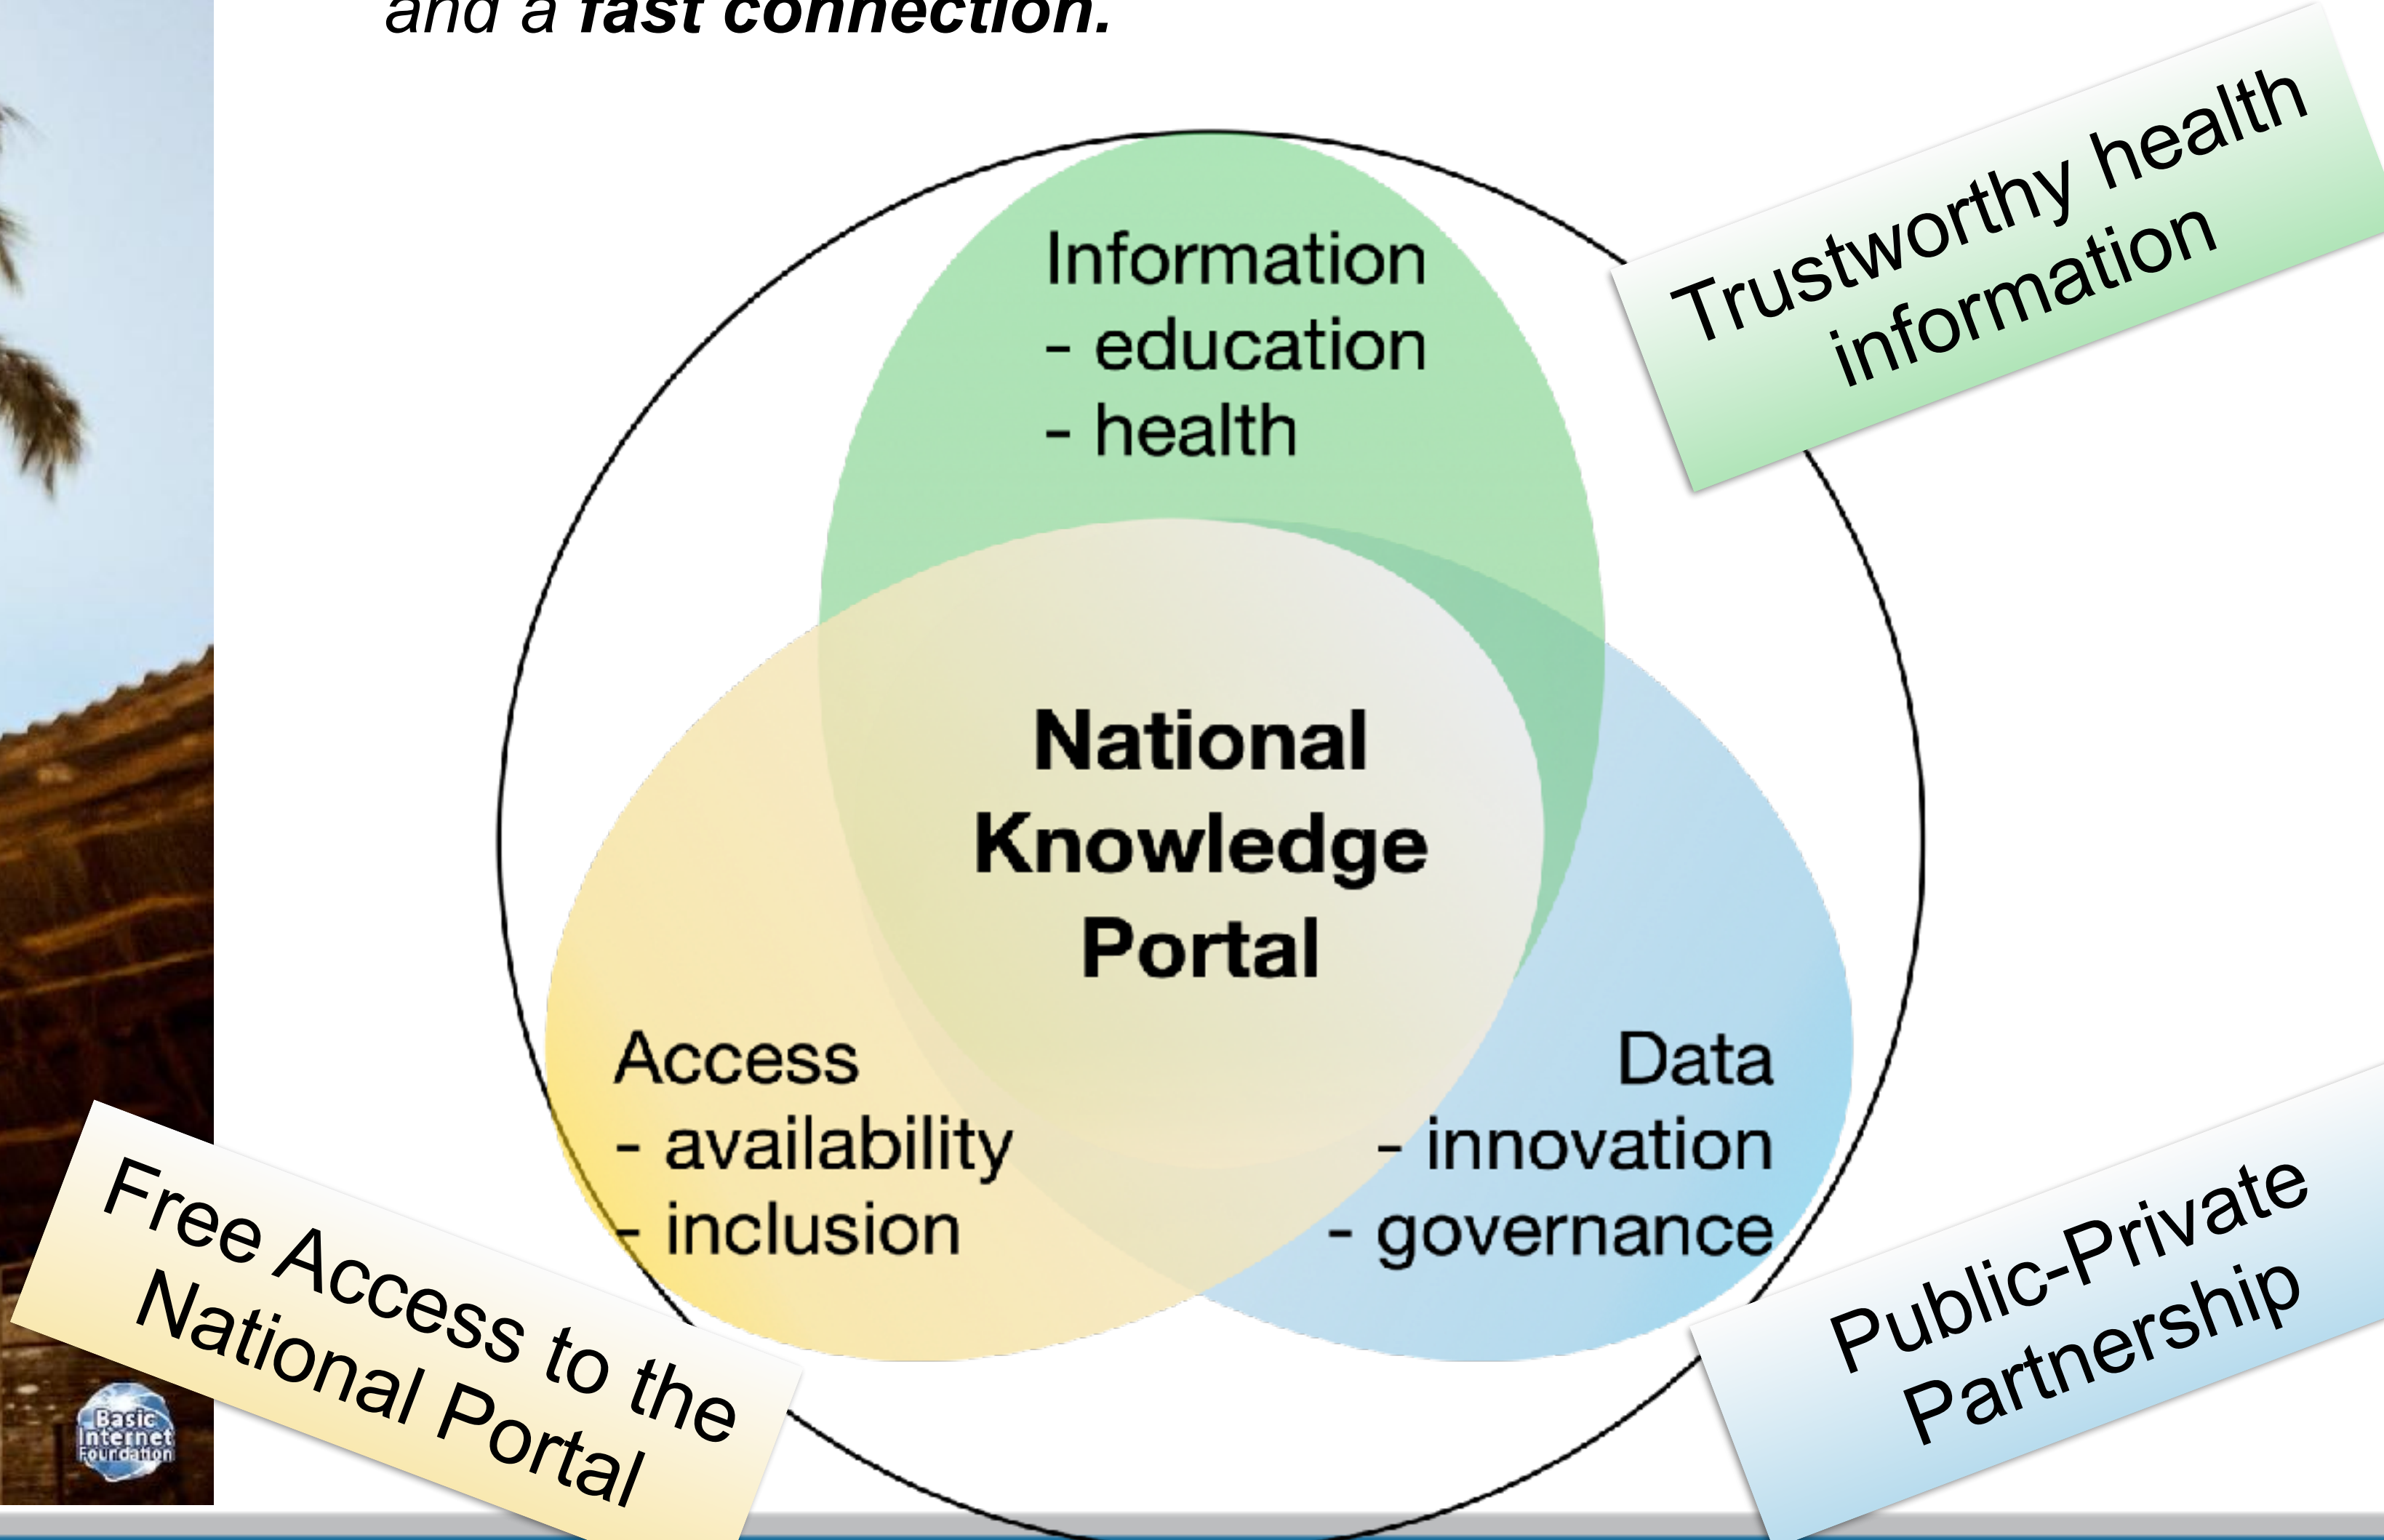

Addressing Health in the Digital World through Innovations & Collaborations

Meaningful connectivity to the internet and **skills** for using an **appropriate device** with **enough data** and a **fast connection**.

Topics for discussion

- Digital Health Promotion and Community Involvements are key topics for SDG 3
- Digital Health Promotion contributes to Digital Skills and is an enabler for the Digital Transformation
- Accessible & Affordable Health Information: “Access to Health Information is a Human Right” and should be free of charge for every single human being
